POWER PLANT SERVICE

Thanks to our extensive service portfolio, we at KIEL Industrial Services AG offer our customers and partners in the power plant sector a modern, holistic, future-oriented range of services, which are tailored to suit the individual and specific requirements of customers in the energy industry.

PIPE PREFABRICATION

At our 8,500 m² production facility, which is in operation for up to 18,000 hours a month, Industrial Pipe Systems GmbH produces pipelines to meet a wide range of specifications and in a variety of materials.

CONTAINER & APPARATUS CONSTRUCTION

TRAUNER Anlagen- und Montagebau GmbH carries out on-site maintenance work and recurring inspections in collaboration with the end user, in line with the German Industrial Safety Regulations (Betriebssicherheitsverordnung). Its monthly production capacity is currently 6,000 hours.

STEEL CONSTRUCTION

Our structural steel prefabrication division has a processing capacity of 50 t per month. We can manufacture profiles measuring up to 600 x 400 mm in lengths of up to 20,000 mm and grid structures measuring up to 5,000 x 5,000 mm.

ENERGY PLANTS

Our entire energy supply infrastructure is undergoing massive change. This change needs to be met with new concepts. KIEL-UNIC Energieanlagen GmbH specialises in optimising and replanning decentralised energy systems and combustion plants.
